We invite you to participate in the prestigious 6th International Conference on Entertainment Computing (ICEC 2007). Entertainment is taking a very important role in our life by refreshing our mind and activating our creativity. With the development of graphics hardware and software, interactive tools, media technologies, new types of entertainment have emerged, such as network games, video-based games and mobile games. Based on the very successful preceding workshop and conferences, the next ICEC 2007 conference has been set up to offer an occasion to exchange new ideas and knowledge among researchers and developers in the field of entertainment computing. Shanghai is the most important economic and financial center in the mainland of China; it is also a tourist city, which has attracted travelers from domestic region and abroad by its commercial activity as well as its scenic beauty.
